

Bato Plastics B.V. enlarges her assortment square pots with a 25 litre pot.

This pot is available in 2 versions:

- Grid bottom with 5 legs, dimensions 345x345x325
- Flat cross-bottom with drainholes, dimensions 345x345x300

Characteristics grid bottom:

- Sturdy pot to use many years
- Very stable on the soil
- 100% grid bottom for optimum drainage
- Possibility to have 8 extra drainholes at the side
- Due to the high legs (25 mm) no roots underneath the pot, less chance to get diseases

Characteristics flat cross-bottom:

- Sturdy pot to use many years
- Very stable on the soil
- Many drainholes in the cross-bottom for excellent drainage
- Possibility to have 8 extra drainholes at the side
- Due to the flat bottom, less likely to freeze the roots

This new pot has the optimum volume for the growth of blueberries, but could be used for other crops as well. The pots are easy to move and the number of plants per m² is easy to change. Because of the good drainage, the substrate will always be in a good condition which results in more fruit per m² and better quality fruit.
